

Concrete Promotion Council of Northern California

Concrete Contractor Membership Benefits:

- As an affiliate member at \$500 per year this level allows your company to be **listed on our website at www.cpcnc.org** under the category “Membership” at (<http://www.cpcnc.org/categories/membership/membership.htm>) as one of our preferred concrete contractors. People requesting recommended contractors are sent to this site regularly.
- You also gain access to the **Buildings Under Design website database** which can be used to keep up with the new projects being designed in Northern CA. See the website at <http://www.buildingsunderdesign.com/search.cfm>. Members receive the User ID & Password.
- The Concrete Promotion Council of Northern California exhibits at a number of **Trade Shows** throughout the Greater Sacramento and Bay Areas each year and your membership provides you the opportunity **to participate and gain leads**. Examples:
 - Green Technology Summit in Sacramento
 - PCBC in San Francisco
 - California Stormwater Quality Association in Oakland
 - West Coast Green in San Jose
- In terms of **Concrete Parking Lot opportunities** and the unprecedented time we’re in regarding high asphalt prices, you would also have access to:
 - **Parking Lot Design Assistance Program** - helps you build a solid case for a cost effective concrete alternative to an owners asphalt design. The Submission Form is attached which highlights the output you can expect.
 - **Concrete Pavement Analyst Software**: We also have a software package for doing cost and design comparisons between concrete and asphalt parking areas. A copy of the Concrete Pavement Analyst is available to you as a member. I provide training so your estimators can become familiar with its use.
 - **NRMCA Pervious Concrete Technician Certification course**: We also provide Pervious Concrete training to Contractors and Designers through this national certification.
- As an affiliate of the Pacific Southwest Concrete Alliance, we have a great resource of information on all aspects of concrete at www.concreteresources.net. A current list of California NRMCA Pervious Concrete Technician Certification is available on a spreadsheet named “California Pervious Concrete Contractors” which is linked on the ConcreteResources.net home page http://www.concreteresources.net/images/graphics/CA_Certified_Pervious_Certified_Personnel.xls.
